

Good to know: University of Belgrade's Faculty of Agronomy celebrated 100 years of existence in 2019.

# Study AGRICULTURE AND FOOD TECHNOLOGY in Serbia

## Knowledge and experience

Serbia is known as a country with organic food production of plant and animal origin. It is worth noting that studying in the field of agriculture in Serbia usually means that you will be able to participate in various national and international projects, meet experts who advise companies and small agricultural holdings, have access to modern laboratories but also gain insight into modern processes of on field food production during your studies.

MINISTRY OF EDUCATION, SCIENCE AND  
TECHNOLOGICAL DEVELOPMENT

- Terazije 39, Belgrade

## Quality

The quality of study programmes and research in these two related fields is demonstrated through high positions on the Shanghai subject ranking lists:

- The University of Belgrade is among the 40 best universities in Europe in Food Science and Technology, and one of the 100 world's universities in this field. Also, the Shanghai Rankings list ranks the University of Belgrade among the 500 best universities in the world in Agricultural Sciences.
- The University of Novi Sad is among the top 300 in Food Science and Technology.

All major Serbian universities provide study programmes in Agriculture and Food Science, within their faculties of agriculture located in Belgrade, Novi Sad and Čačak and technological faculties in Leskovac and Novi Sad.
